Forecast for Friday 01 Oct 2021

Weather: Persistent, locally heavy, rain and patchy low cloud will clear during the morning to leave a brighter day with some good sunny spells but also frequent showers. These showers will be fast moving in the strong westerly/southwesterly winds but are likely to be heavy at times with a low risk of hail and thunder. Conditions remain similar overnight with showers merging into longer spells of rain by dawn.

Chance of cloud free mountain/hill tops above 600m: 40% during the early morning but improving to become 90% by the afternoon.

Visibility: Patches of low cloud obscuring hills above 500m through the morning, giving some poor visibilities, particularly in association with more persistent rain. Cloud lifting to well above summits into the afternoon with very good visibility in general, though falling quickly to a few kilometres in showers.

Meteorologist's View

Strong blustery winds likely though the day and these could locally gust to 35-45mph over the highest tops and in association with heavy showers during the afternoon. These strong winds giving a very cool feel to the day at higher levels despite the bright conditions.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Thu 30 Sep 2021	10.6mm	22.8mm	30.2mm

Forecast for Saturday 02 Oct 2021

Weather: Early outbreaks of rain will turn heavy and persistent into the afternoon and evening, with strong winds at times as an area of heavy rain crosses the after through the day. This will clear into the evening to leave drier, clearer but still windy conditions with the risk of showers overnight.

Maximum wind: Southeasterly winds meaning 20-25mph and gusting 30-40mph are possible into the afternoon.

Chance of cloud free mountain/hill tops above 600m: 80% to start but reducing through the morning to become 30% into the afternoon and evening.

Visibility: Patchy low cloud likely to start obscuring the highest peaks above 600m, but this will tend to thicken and lower into the afternoon to give widespread low cloud above 200-300m by the evening and some poor visibility in persistent rain. Conditions will improve overnight as rain clears away.

Temperature: **Valleys:** Plus 8 Celsius, becoming Plus 10 Celsius during the day.
At 600m: Plus 6 Celsius
Freezing level: Above summits.
